TKB A1 or TBK A2

NL
* Floorfixx egaliseert maximaal een hoogte van 2 mm over twee strekkende meters.
** Bij installatie van meerdere ruimtes, iedere ruimte afzonderlijk installeren.
*** Kras met de punt van het mes langs de rij (plaat).
Snij de 2e keer met het mes de plaat zover mogelijk door.
**** Bij een oppervlak van 10 mtr lengte en/of breedte, dient een dilatatievoeg aangelegd te worden zowel in Floorfixx als in de vloerbekleding. De vloerbekleding moet een dikte hebben van minimaal 2 mm. Installeer de vloerbekleding binnen 24 uur na installatie van Floorfixx.

EN
* Floorfixx subfloor levels maximum 2 mm of unevenness at a length of two linear meters or yards.
** In case of installation of several areas, install every area separately.
*** Scratch with a knife along the straight edge (board). Cut the board the second time as much as possible.
**** With surfaces over 10 mtr length and/or width, make a dilatation joint in both Floorfixx and the floorcovering. The floor covering must have a thickness of at least 2 mm thick. Lay the floor covering within 24 hours of laying Floorfixx.

DE
* Floorfixx egalisiert maximal 2 mm Unebenheiten über eine Distanz von 2 lfm.
** Bei Verlegung von mehrere Räumen, jedes Raum separat verlegen.
*** Kratzen Sie mit einem Messer den Stahlleiste (oder Bodenplatte) entlang. Das 2. Mal Kratzen Sie mit die Platte so weit möglich durchschneiden.
**** Bei Flächen von 10 mtr. lang und/oder breit, soll eine Dehnungsfuge gemacht werden in Floorfixx und im Bodenbelag. Der Bodenbelag muss eine Dicke haben von mindestens 2 mm. Verlegen Sie den Bodenbelag innerhalb von 24 Stunden nach der Verlegung von Floorfixx.

FR
* Floorfixx égalise max. 2 mm sur une distance de 2 mtr. lin.
** En cas de pose de plusieurs espaces, poser chaque espace séparément.
*** Gravez le panneau le long une règle (ou un autre panneau) avec un couteau. La 2ème fois couper le panneau.
**** En cas de surfaces de 10 mtr. de longueur ou largeur, faire un joint de dilatation dans Floorfixx et dans le revêtement. Le revêtement de sol doit avoir une épaisseur de 2 mm d'épaisseur minimum. Poser le revêtement de sol définitif dans les 24 heures après la pose de Floorfixx.
